

Fan Making Noise?

<p>01</p>	<p>Fan must be installed as per standard guidelines shown in the image. (all SINOX accessories like down-rod, shackle kit and canopies must be used.)</p>	
<p>02</p>	<p>Extra wire bunch should not be pushed into the canopies. The wires should be tied properly in a way that it doesn't touch the canopy. (loose wires can make noise while fan is running).</p>	
<p>03</p>	<p>All screws on blade, canopy, down-rod and shackle kit must be tightened properly.</p>	
<p>04</p>	<p>We recommend the use of D-type hooks. If any other type of hook is in use, then ensure that down-rod must not have any movement while the fan is running.</p>	
<p>05</p>	<p>Regulator bypassing is recommended.</p>
